Example of TORs for heifer production task force:

- a) take inventory of land and other resources that can be urgently made available for breeding/heifer production including beef ranches
- b) examine different options [models] for the production of heifers and make suggestion on which ones fit in the TZ context
- c) Facilitate conduct of demand and supply study on heifers and semen in TZ. Disaggregate supply from public and private sector
- d) take inventory of other projects/initiatives [current and on-coming] that have potential to contribute to production of heifers and bulls/semen
- e) Analysis of current situation regarding NAIC [national artificial insemination centre] – review what it is producing at the moment [quantity and quality] and shortfalls. Including examination of possibility of producing crossbred semen.
- f) Do what else is needed to address dairy heifer and semen situation in TZ.

General Guideline for other Task Force

- a) Consolidate the most pressing industry bottlenecks in the challenge area from the discussions of this meeting
- b) Propose interventions and actions to address the identified bottlenecks
- c) To develop a work plan for the next 12 months
- d) Implement the action plan with reports presented to DDF in August 2014 and January 2015
